Personal Statement:

Android Developer with 2+ years of experience designing and deploying production-level mobile applications using Kotlin and Java. Experienced in building healthcare and educational applications currently live on the Google Play Store, with expertise in Firebase integration, SQL databases, and secure health data handling. Currently pursuing an MSc in Computer Science at the University of East London, specialising in AI and Cloud Computing. Seeking Android or Software Engineering roles where I can contribute to scalable, user-focused solutions.

Technical skills

Software: Android Studio, Microsoft Office, Adobe Illustrator, Power Bi, MATLAB

Servers: Cloud Computing Platforms (AWS, Azure, Firebase)

Coding languages: Java, Kotlin, C++, HTML, Python, Laravel

Databases: Microsoft SQL Server, SQLite, SQL

Domains: Mobile App Development (Native Android), Artificial Intelligence, Cloud Computing, Web Development

Key Skills, Certifications and Achievements

MS Office: Intermediate LinkedIn Learning

AWS Cloud Practitioner: Foundational

MATLAB: Deep Learning Onramp, MATLAB Onramp, Machine Learning Onramp

Education:

University of East London (UEL) – United Kingdom

MSc in Computer Science (MScS) | 2025 – 2027 (Expected)

- Currently pursuing advanced coursework in cloud computing and artificial intelligence.
- Working on research and projects related to AI and Cloud Computing.
- Term Project: Developed Employee Management System Android App using Kotlin and Firebase to manage attendance and tasks for teams of the employees.
- Modules: Cloud Computing, Artificial Intelligence, Big Data, Software Engineering

National University of Technology (NUTECH), Islamabad – Pakistan

BSc in Computer Science (BSCS) | 2018 – 2022

- CGPA: 3.07/4.0
- Final Year Project: Developed Fuel Cost Management System for airline operations using Java and SQL, improving fuel cost tracking and reporting efficiency.
- Semester Project: Semester Project: Automated Sentry Gun – Awarded 2nd Prize in CS Department for innovative design and implementation
- Gained expertise in native Android development, cloud computing, and software engineering principles.
- Modules: OOP, Computer Networks, DSA, Programming fundamentals, Machine Learning, Software Engineering

Work Experience:

Android Developer

Techsasoft, Islamabad

November 2022 – November 2024

- Developed 5+ Android applications (healthcare & education) published on Google Play with 25,000+ combined downloads, improving user engagement by implementing Firebase real-time syncing and intuitive UI design.
- Collaborated with cross-functional teams to design and implement features for a variety of apps, ensuring efficient backend integration.
- Utilised Java and Kotlin to build reliable, high-performance Android applications.
- Conducted unit testing and troubleshooting to optimise app performance and resolve bugs in the development cycle.
- Integrated cloud-based solutions (e.g., Firebase) for real-time data syncing and efficient backend services.
- Projects: Pregnancy Tracker, Ovulation Tracker, Weight Tracker, Period Tracker, Quiz App for Children and an app for tracking medication orders for patients.
- **Live Applications on Google Play Store (Click to View):**
 - 1) [Period Tracker](#)
 - 2) [Pregnancy App](#)
 - 3) [BMI Calculator](#)
 - 4) [Weight Tracker](#)
 - 5) [My Clinic](#)

Intern (Ticketing Office)

Pakistan International Airlines (PIA), Islamabad

July 2022 – August 2022

- Designed a Fuel Cost Management System as part of the Final Year Project, improving fuel tracking and budgeting for the airline.
- Gained foundational knowledge of Power BI, creating dashboards to analyse and visualise operational data for better decision-making.
- Developed an understanding of data management and reporting, offering insights into streamlining internal processes at the ticketing office.
- Assisted in customer service and administrative tasks, gaining exposure to the operational side of the aviation industry.

Hobbies & Interests:

Interests: Painting and drawing, reading (personal development & fiction), travelling.

Availability:

From June 2026 onwards I am allowed to work Full time by my university.
